VariTrans® P 27000-S008
Universal Isolators
1. Safety Information

The warning symbol on the device (exclamation point in triangle) means: Observe instructions!

**Warning! Protection against electric shock**
For applications with high working voltages, take measures to prevent accidental contact and make sure that there is sufficient distance or insulation between adjacent devices!

**Caution!**
Be sure to take protective measures against electrostatic discharge (ESD) when handling the devices!

**Caution!**
The VariTrans® P 27000 universal isolators must be installed only by qualified and specially trained personnel authorized by the operating company. Do not connect the device to power supply before it is professionally installed. Do not change the measuring range during operation. Observe the national codes and regulations during installation and selection of cables and lines. Equipment shall be provided with a means for disconnecting it from each operating energy supply source. The disconnecting means shall disconnect all current-carrying conductors. (It must be easily accessible and clearly identifiable by the operator.) Mains supply must be protected by a fuse of 20 A max.
**Warning! EXPLOSION HAZARD**
Do not connect/disconnect equipment unless power has been removed or the area is known to be non-hazardous.

**Warning! EXPLOSION HAZARD**
Substitution of components may impair suitability for Class I, Division 2.

**Conditions for safe use (Haz. Loc.)**
For the use in hazardous locations, this equipment is to be installed into suitable enclosure, providing a degree of protection not less than IP 54.

Devices containing user accessible switches and/or potentiometers: the device must be installed into an end-use enclosure with tool removable cover.
2. **Intended Use**
The special models P 27000-S008 universal isolators are used for galvanic isolation and conversion of input signals from 0 ... ± 200 V to output signals from ±0 ... 10 V or ± 0 ... 20 mA. The calibrated output signal range is selected via DIP switches. Signal transmission is linear. By means of the broad-range mains adapter, the units can be powered by voltages from 20 to 253 V AC/DC. Connection is made using pluggable screw clamp terminals.

![Warning against misuse](image)

**Warning against misuse**
Do not operate the device outside the conditions specified by the manufacturer, as this might result in hazards to operators or malfunction of the equipment.

3. **Configuration**

3.1 **Tools**
A screwdriver with a width of 2.5 mm is required to open and adjust the unit and to connect the wires to the screw clamp terminals.
3.2 Opening the unit
Disengage the top part of the housing on both sides using the screwdriver.
Pull out the top part of the housing and the electronics section until they lock.

3.3 Settings
Adjust the output range using DIP switches S1, S2 and S3 as shown in the tables or on the rating plate.

8. Power supply ≈

Wire cross-section max. 2.5 mm²  
Multi-wire connection max. 1 mm²  
(two wires with same cross-section)  
AWG 30-12, tightening torque 0.7 Nm  
Wiring has to be suitable for a temperature of min. 75 °C

**Warning!**
For applications with high working voltages, take measures to prevent accidental contact and make sure that there is sufficient distance or insulation between adjacent devices!

**5.1 Power supply**
22 to 230 V AC/DC ± 10 %, 0.9 W, AC 48 to 62 Hz, 2.5 VA,  
(overvoltage category II)
6. **Dimensions**

Fixed screw clamp terminals

Metal lock for fastening on top-hat rail
7. **Declarations, Certificates and Approvals**

**CE marking**
The EU Declaration of Conformity is included in the documentation.

**Ex**
The Statement of Conformity for ATEX Zone 2 apparatus is included in the documentation.

**UL**
Open-type Process Control Equipment also listed
File: E340287, E308146, E340288

**GL**
Certificate No. 42 843 - 02 HH
Environmental Category: D
Test Standard: Regulations of the Performance of Type Tests, Part 1 EN 61010-1

1) Higher output load on request
2) Average TC in specified operating temperature range -10 °C ... +70 °C.
3) cULus certification: Working voltage (basic insulation) up to 600 V,
   working voltage (reinforced insulation) up to 300 V across input and output,
   each for overvoltage category II and pollution degree 2
4) Slight deviations are possible while there is interference
