Manufacturer's Declaration

REACH, Art. 33

Document No.

QM190301B

Subject

Regulation (EC) No 1907/2006, Article 33
Duty to communicate information on substances in articles

Statement

The EU has established a system for the registration, evaluation, authorization and restriction of chemical substances under the REACH Regulation.

The purpose of this Regulation is to ensure a high level of protection of human health and the environment, including the promotion of alternative methods for assessment of hazards of substances, as well as the free circulation of substances on the internal market while enhancing competitiveness and innovation.

Herewith we confirm that we apply lead (Pb), CAS 7439-92-1, EG 231-100-4, as alloying component with a percentage of more than 0.1 w/w in several of our products.

These alloys are used in inner parts of our products. During normal conditions of use the lead will not be released. We therefore exclude direct contact with the contained lead during normal use of our products.

Several of our products contain cyclic siloxanes in varying concentrations (as single substance or in total) caused by the manufacturing process:

- Octamethylcyclotetrasiloxan (D4), CAS 556-67-2
- Decamethylcyclopentasiloxan (D5), CAS 541-02-6
- Dodecamethylcyclohexasiloxan (D6), CAS 540-97-6

Articles containing these substances are used in inner parts of our products. During normal conditions the cyclic siloxanes will not be released. We exclude direct contact with the contained cyclic siloxanes during normal use of our products.

Berlin, March 01, 2019

Dr. Edgar Ballin
Quality Management Representative
